

# **1MWh Off-Grid Solar Container Used at North Asian Port Terminals**

## Overview

---

What is pknergy 1MWh battery energy solar system?

The PKENERGY 1MWh Battery Energy Solar System is a highly integrated, large-scale all-in-one container energy storage system. Housed within a 20ft container, it includes key components such as energy storage batteries, BMS, PCS, cooling systems, and fire protection systems.

How many energy storage devices can a port configure?

Energy storage devices are limited in the amount of power they can store and charging power cannot exceed their maximum storage capacity. In this paper, it is assumed that if the port chooses to configure its energy storage devices, it can only select one type of energy storage device and will not choose more than that.

What is a 1MWh Battery Energy Storage System?

A 1MWh Battery Energy Storage System, such as PKENERGY's 20ft container solution, stores energy equivalent to 1 megawatt-hour. It includes 5 clusters connected to a 500kVA power conversion system (PCS) for output at 340-440VAC. The system also includes a 500kW three-phase inverter with a 98.3% conversion efficiency and a 300kW inverter for DC to AC conversion.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
