

2 3 3 watt solar panels

Overview

GoGreenSolar's DIY solar kits empower you to install your own solar system, and our team of solar experts is on hand to guide you through the process. Once you're ready to go solar, we can provide a free s.

How many solar panels does a 3 kilowatt solar system need?

As residential solar panels are generally rated between 330 watts and 400 watts these days, a 3 kilowatt (3,000 watt) solar system will require about 7-10 solar panels. A typical solar panel is around 1m x 1.7m, therefore a 3kW system will require about 12-17 m² of roof space, depending on the wattage of the panels.

How much energy does a 3KW solar panel produce?

If you want to learn more, check out our full guide to solar panel costs. How much energy will a 3kW solar panel system generate?

A 3kW solar panel system in the UK will produce an average annual output of around 2,550kWh, if it's dealing with typical UK irradiance. This means you'll usually produce roughly 85% of your system's peak power output.

What is the difference between a 3Kw and 5kW Solar System?

The difference between a 3kW and 5kW solar panel system is around four panels, if your system is composed of 450-watt panels – which will likely cost you an additional £2,500, roughly. On average, a 3kW system will produce 2,550kWh per year, while a 5kW array will generate 4,250kWh.

How much does a 3 kW solar panel cost?

A 3 kW solar panel system costs \$9,150 in 2025 before incentives. A 3 kW solar panel system produces about 4,356 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 3 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company.
