2 kWh solar container outdoor power price

Overview

How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

How much space does a 2KW Solar System need?

A 2kW solar kit from GoGreenSolar requires about 107 square feet of space. Solar panels with microinverters allow you to place panels in various locations, directions and angles on your roof. This choice will offer you more flexibility if space is at a premium.

How much energy does a solar system use per month?

This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit. Consider hiring a local contractor or installing your own solar panel kit for additional savings!.

How many solar panels do I Need?

The number of solar panels required to generate 2 kilowatts of energy hinges on the efficiency of your panels. Typically, you would need about 8 panels, but because GoGreenSolar panels are highly efficient, they can do the job with 5 panels. How much space will the solar panels take on my roof?
