

# **20550 cylindrical solar container lithium battery**

## Overview

---

How many Li-ion cylindrical battery cells are there?

This paper investigates 19 Li-ion cylindrical battery cells from four cell manufacturers in four formats (18650, 20700, 21700, and 4680). We aim to systematically capture the design features, such as tab design and quality parameters, such as manufacturing tolerances and generically describe cylindrical cells.

What is the CT analysis of the inr21700-m50lt battery cell?

CT analysis of the INR21700-M50LT battery cell: (a) Wavelength analysis; (b) CT-image, cross section; (c) Composite thickness; (d) Mechanical inhomogeneities in jelly rolls with classic tab design. The wavelength evaluation was conducted on two sides: The tab-free side (homogeneous side) and the side with two tabs (inhomogeneous side).

How to design cylindrical Li-ion battery cells?

A generic overview of designing cylindrical Li-ion battery cells. Function 1: Two types of jelly roll designs can be distinguished: With tabs and tabless. Jelly rolls with tabs can be realized with a single tab (Design A) or several tabs in a multi-tab design (Design B).

What are the joining techniques used in Samsung inr21700 40T & 50E battery cells?

The joining techniques are the same as in embodiment a. This design is used in the Samsung INR21700 40T and Samsung INR21700 50E battery cells. The anode tab is placed on the outside of the jelly roll. The cathode tab is placed on the inner diameter of the jelly roll.

## 20550 cylindrical solar container lithium battery
