What are on grid solar inverters?

On grid solar inverters require both solar and grid power to operate efficiently. These inverters are generally eligible for subsidies of up to 78,000 from the central government.

How does a solar inverter work?

A 25kW three phase grid tie solar inverter works on a string scale. For example, if there are 30 solar panels in the array, they can be divided into 5 strings, meaning 6 solar panels per string. For each string, there will be a solar inverter, resulting in a solar system with multiple string inverters.
