

# **3 6 kw solar inverter factory in Cambodia**

## Overview

---

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Does Cambodia have solar power?

However, considering the country's historical energy mix, the existing solar capacity appears positive. As of 2011, Cambodia had no solar power plants, and solar energy was not a part of the country's energy mix. Cambodia's current installed solar capacity is slightly over 400 MW, but the country is targeting 3.1 GW by 2040.

How does electricity work in Cambodia?

In Cambodia, electricity generation is dominated by hydro power and coal power plants. Power outages are especially common in the dry season, making Cambodian businesses dependant on diesel back-up systems to ensure their electricity supply. Both, high electricity costs and power.

Is Cambodia a good place to invest in solar energy?

Cambodia has one of the highest solar energy potentials in the region. The country plans to significantly scale up capacity in the coming decades to strengthen the energy grid and reach its net-zero emissions goals.
