

400ah portable power bank

Overview

What makes the opb-p400q a good power bank?

The OPB-P400Q makes staying charged effortless with PD&QC 3.0 for rapid input and output, a big digital display for easy monitoring, and an LED torch for emergencies. With five outputs to charge multiple devices at once and a maximum 5A output, this power bank is the ultimate companion for tech-savvy travelers and busy professionals.

What is a portable magnetic charging power bank?

Portable wireless magnetic charging power bank wirelessly charges mobile devices (up to 18W) when plugged into a power source or as a 4000mAh battery pack.

How much power does a power bank charge?

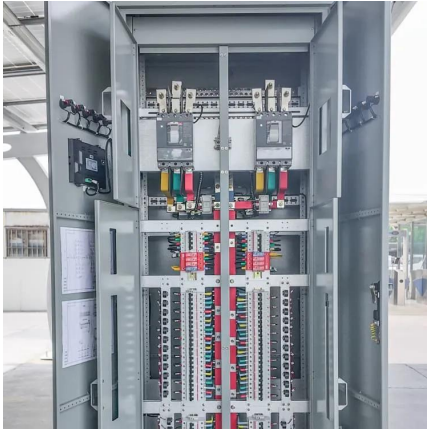

Power banks charge at around 80% efficiency. Most premiere flagship phones have a battery around 5,000 mAh, but a 5,000 mAh battery pack cannot charge your phone to 100%, it will be closer to 80% charged. We've tested these battery packs to see how many times they can charge an average smartphone, and how efficiently they transfer power.

How much power does a power bank give a phone?

Our testing shows that a power bank can offer your phone between 70-80% of the power it contains, or more depending on the battery. It loses the rest due to the inefficiency of the power transfer. That means a 5,000 mAh battery can fully charge a phone with a 3,500 mAh battery, like an iPhone 16.
