

# **60kWh photovoltaic container for water plant**

## Overview

---

What is a dual use of water for solar PV based electric power production?

This dual use of water for both solar PV based electric power production and aquaculture is called aquavoltaic. The electric energy generated by the aquavoltaic system can be used to power aeration units, light emitting diodes, water pumps of the aquaculture tank, and other electric loads like lights, fan, fridges etc., [ 166 ].

How does LZY's photovoltaic power plant work?

LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Can wastewater treatment plants be used for solar PV projects?

The potential of using wastewater treatment plants for solar PV projects is found to be economically viable in twenty six urban sites of China. Self consumption of the PV power by the waste water treatment plant and solar radiation potential of the plant plays an effective role in deciding the economic viability of this initiative.
