Is solar a viable option for shipboard power systems?

(Tick all that apply) Despite being a hard-to-abate industry, shipping is witnessing an acceleration in the adoption of clean technologies. Solar is emerging as a particularly attractive option for integration into shipboard power systems due to its abundance, reliability and zero-emission profile.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.
