AC Uninterruptible Power Supply Customization

Overview

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

What is an uninterruptible power supply?

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but only for a short period of a few minutes – until a backup power supply comes online or until the load completes its shutdown sequence.

What is a Systron AC UPS system?

SYSTRON AC UPS System . A Powerful and Reliable Solution from a Source You can Trust The Systron Uninterruptible Power Supply (UPS) System is specially customised and designed to provide reliable back-up power and maximum protection from electrical anomalies for your critical equipment including non-linear computer and electronic equipment.
