

# Algeria environmentally friendly solar energy system application

## Overview

---

Is Algeria ready for a solar-diesel Project?

The Algerian government held tenders for off-grid, hybrid solar-diesel and PV projects in 2019. Both procurement rounds were part of the country's plan to deploy 22 GW of clean energy generation capacity by 2030, including 13.6 GW of solar.

Does Algeria have solar power?

Regarding solar power potential, Algeria is home to some of the world's highest solar irradiance levels, with the capacity to generate 1,850 to 2,100 kilowatts per hour and up to 3,500 hours per year in its desert regions.

Is Algeria ready for solar PV?

In addition, Solar PV in Algeria is in the process of transitioning from the utility-scale sector to increased uptake across residential, commercial, and industrial (RCI) sectors.

Will Algeria build a one-gigawatt solar energy project in 2021?

Towards this end, Algeria launched a tender for a one-gigawatt solar energy project in 2021, comprised of building five power generation sites ranging from 50 to 300 MW each.
