

All in one solar power system in Ethiopia

Overview

Does Ethiopia have solar energy?

Ethiopia aims to diversify its electricity generation capabilities by investing into an energy mix, of which photovoltaics will be a part. There are excellent conditions to use solar energy in Ethiopia, in particular in Tigray Region and on the eastern and western rims of the Ethiopian Highlands (roughly 2% of Ethiopia's area).

Can solar power transform Ethiopia's energy landscape?

Among these, solar energy emerges as a beacon of hope, poised to transform Ethiopia's energy landscape and drive socioeconomic development. Significantly, the country has relied heavily on hydropower, which accounts for more than 90% of its electricity generation.

Why is Ethiopia investing 300 million USD in solar energy?

She mentioned that the country's focus is on the solar energy sector, where Ethiopia is investing 300 million USD in a project aimed at generating 300 megawatts of solar energy. It does not only support the country's renewable energy goals but also contributes to reducing carbon emissions and promoting sustainability, she said.

How many solar home systems are there in Ethiopia?

There are also around 40,000 small off-grid solar home systems (including slightly larger solar institutional systems) for remote rural areas of Ethiopia with a total installed capacity of another 4 MW e. All SCS power plants combined have an installed capacity of around 30 MW e.
