

Armenia base station sharing power signal

Overview

How has energy security changed in Armenia?

Armenia's energy security has greatly improved since the gas and power supply crisis in the early to mid-1990s. During the crisis, energy sector management was dysfunctional, losses were extremely high, and the collection rate was below 50%. This resulted in acute supply shortages, with households receiving only a few hours of power per day.

Why should Armenia invest in a power transmission network?

"To ensure affordable, reliable, and clean electricity supply for consumers, Armenia needs continued investments in modernizing the power transmission network and improving the commercial viability of the High-voltage Electric Networks of Armenia JSC, the transmission company.

How reliable is the energy system in Armenia?

Energy system reliability in Armenia is now considered adequate, as investments in electricity and gas infrastructure, increased residential access to gas and operational improvements since the mid-1990s have led to significant declines in outages and losses.

What are the energy reforms in Armenia?

The reforms went into effect starting February 1, 2022. The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure (MTAI), which is responsible for overall energy policymaking; the Ministry of Environment; the PSRC; and the Committee on Nuclear Safety Regulation (ANRA).
