

Asia Power Storage Project

Overview

A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction period, reflecting China's accelerating rollout of large-scale storage to firm and integrate high penetrations of wind and solar generation. Which countries are deploying a battery energy storage system (BESS) in 2025?

Spanning Australia, Japan, Southeast Asia and South Asia, these deployments represent a substantial contribution to 16 GWh of new Battery Energy Storage System (BESS) capacity projected to be added in APAC (excluding China) in 2025, according to BloombergNEF.

Why is Trina storage growing in Asia Pacific?

"Our growing presence across APAC reflects not only strong market demand but growing recognition of Trina Storage's differentiated technology, delivery capabilities, and long-term reliability," said Dr Leo Zhao, Head of Energy Storage at Trinasolar Asia Pacific.

What does Trina storage do for APAC?

With utility-scale projects underway across the region, Trina Storage continues to expand its footprint and support APAC's clean energy transition through safe, high-performing, and future-ready energy storage solutions.
