

Base station blade battery price

Overview

What is BYD's next-generation blade battery?

In the rapidly evolving world of electric vehicles (EVs), where cost and efficiency are king, BYD has announced a game-changing development. The Chinese giant, known for its substantial strides in the EV market, is now targeting a 15% reduction in battery costs with its next-generation Blade Battery 2.0.

What is blade battery?

Blade Battery can change the size of the battery pack in the X and Y directions according to the vehicle space, and develop batteries of different specifications. This platform-based battery effectively reduces development costs and time. Its patent shows that there are at least 8 types of blade battery solutions.

How will BYD's new blade EV battery work?

The new Blade batteries will feature higher energy density and faster charging rates. According to the latest, they will also get a price reduction. A source close to the matter told CarNewsChina that BYD aims for a 15% cost reduction for the new Blade EV battery. The new unit will have an energy density of up to 210 Wh/kg with 16C peak discharge.

Should you buy a BYD blade battery?

There are two main opinions here: One is that the blade battery has no new ideas, is similar to the CTP of the CATL, and is just a marketing gimmick by BYD. The other is that blade batteries solve many of the shortcomings of lithium iron phosphate and are groundbreaking. Next, we will talk about the BYD blade battery. Part 1.
