

# Battery cabinet construction site power supply

## Overview

---

Why do construction sites need battery energy storage systems?

Electrically powered equipment, when supplied by a battery system, operates silently, fostering a more harmonious relationship with the surrounding environment and communities. The adoption of Battery Energy Storage Systems represents a significant leap forward in construction site operations.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

Can a battery energy storage system replace diesel-fuelled construction site equipment?

As a low carbon alternative, Battery Energy Storage System (BESS) has been viewed as a viable option to replace traditional diesel-fuelled construction site equipment. You can gain a better understanding and more knowledge on BESS adoption by our advisory services and [General Guideline on BESS Adoption for Construction Sites \(PDF\)](#).

Should a battery energy storage system be installed for customer self-use?

For Developers: For Contractors: If a Battery Energy Storage System (BESS) will be installed for customer self-use, it should be ensured the BESS does not have capability to export power to or back energize the distribution network connected in parallel with the main grid.
