

Battery storage prices in Italy

Overview

Does Italy have a battery storage market?

Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market. Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives.

Why is Customer-Sited storage so popular in Italy?

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established favourable electricity market rules that enable projects to earn revenues from a range of different sources.

Does Italy have a strong appetite for battery storage?

Image: TERNA via Twitter. The success of an auction for fast reserve grid services held by Italy's transmission system operator (TSO) indicates a strong appetite for battery storage, but market rules and regulations need some revision to capture that opportunity.

How many GW of battery storage will Italy have by 2050?

The remaining 3-4 GW is expected to come from utility-scale systems. By 2050, Italy aims to achieve 30-40 GW of storage capacity. There are significant regional differences in the adoption of battery storage systems across the country.
