

Blown fuse in circuit breaker in Monaco

Overview

Locate your home's circuit breaker. Your home's circuit breaker, or service panel, is easily identifiable. Look for a gray steel box with a hinged door. It will either be

How do you fix a blown circuit breaker?

First, locate your circuit breaker or fuse box. Depending on the age of your home, you could have either. Once located, turn off the power supply to the affected circuit by flipping the corresponding switch or removing the fuse. Next, remove the blown fuse and replace it with a new one with the same amperage rating.

What is a blown fuse?

A blown fuse is a safety device that 'blows' when too much current is present in an electrical circuit. It stops the current flow, thus avoiding further damage. Reasons for this include: Knowing why a fuse 'blows' can help identify and sort out problems swiftly. Figuring out the cause of a blown fuse is really important!.

What happens if a fuse is blown?

A blown fuse occurs when too much electrical current flows through the circuit, causing it to overheat and melt. This can happen due to an overload of appliances or faulty wiring. To replace a blown fuse, you will need to first locate the circuit breaker panel in your home.

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:
