

Canberra solar Power Generation and Energy Storage

Overview

Does Canberra have battery storage?

Battery storage for residential solar energy is becoming increasingly popular in Australia – including in Canberra, ACT. If you're a Canberra resident looking to install a battery storage system for your home, what are the main things that you need to consider?

.

How much do solar panels cost in Canberra?

With an average cost of \$4,270 for a 3kW system, the typical cost for solar panels in Canberra is below the national average across 3kW to 10kW systems. A growing market in solar, Canberra offers a range of options for solar self-consumption and feeding energy back to the grid, giving residents a 'credit' for excess solar energy sent to the grid.

Does solar energy storage make economic sense in Canberra?

Whether or not solar energy storage makes economic sense for your home in Canberra depends first and foremost on whether or not you already have a solar system, and if you do whether or not you have access to a Territory-supported solar feed-in tariff.

What is the Big Canberra battery?

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future. For technical specifications of our work on the Big Canberra Battery, or to discuss engaging us on similarly ambitious battery storage projects, please contact our team.
