

Overview

How can Cape Verde meet its goal of 50% renewables?

Cape Verde can meet its goal of 50% renewables today by integrating energy storage. A 100% Renewable System is achieved from 2026, with a 20 year cost from 68 to 107 M€. Current paradigm doubles emissions in 20 years and costs ranges from 71 to 107 M€. The optimal configuration achieves 90% renewable shares with a cost from 50 to 75 M€.

Why is Cape Verde's energy grid falling out of scope?

Nevertheless, we discarded this due to the fact that the grid in Cape Verde is currently in expansion and this process is expected to continue during the foreseeable future following criterias related to energy access and political will, rather than techno-economical feasibility. Thus, falling out of scope.

Does Cape Verde have a wave energy potential?

In the case of Cape Verde, there is one study evaluating the wave energy potential which highlights the resource available, particularly for the northern islands, such as São Vicente . Unfortunately, the study identifies the wave resource to match that of the wind.

Is Cape Verde a developing state?

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources. Aligned with the global energy transition, the local government established goals in 2011 aiming at 50 and 100% RES.

Cape Verde solar glass sector planning

[Solar in Cabo Verde: 3 Key Markets for Local Module ...](#)

Sep 1, 2025 · The tourism, desalination, and inter-island grid sectors represent concrete, addressable markets for a new solar module manufacturer in Cabo Verde. Each sector is ...

[2025 Solar Glass Market: Global Industry Trends & Analysis](#)

Oct 8, 2025 · The Evolution of Photovoltaic Glass Technologies The solar glass industry stands at the cusp of a remarkable transformation as we approach 2025. This specialized glass, ...

Decarbonizing energy islands with flexibility-enabling planning...

Apr 1, 2023 · Abstract The growing interest in fully decarbonizing worldwide energy systems requires abandoning traditional generation expansion planning in favour of other flexibility ...

[Cabo Verde: Clean energy, grid upgrades key for economic ...](#)

Jan 16, 2025 · Fostering a climate-resilient blue economy: Diversifying the tourism sector, improving sustainable fisheries management and protecting coastal ecosystems. Upgrading ...

[Towards 100% renewable islands in 2040 via generation ...](#)

Jun 1, 2022 · Their common challenges and energy policies are exemplified with a comprehensive generation and storage expansion planning (GSEP) for the island of São Vicente, Cape Verde. ...
