

# **Chilean Communications 5G Base Station Latest**

## Overview

---

Does Chile have 5G?

In recent years, Chile has transitioned to 5G networks, with three national operators—Entel, Movistar, and WOM—launching 5G services by late December 2021. Claro, however, was the only operator without 5G at that time, due to regulatory restrictions on using certain spectrum bands for smartphone services.

Why does Chile have a high 5G penetration rate?

This high penetration rate is driven by the widespread adoption of mobile technology and the government's efforts to improve connectivity through initiatives like the Zero Digital Gap Plan. In recent years, Chile has transitioned to 5G networks, with three national operators—Entel, Movistar, and WOM—launching 5G services by late December 2021.

How many 5G base stations does China have?

China has deployed over 2.4 million 5G base stations as of 2023, accounting for over 60% of the global total. China is leading the 5G revolution. With over 2.4 million base stations, the country accounts for more than 60% of all 5G infrastructure globally.

Does Chile have a mobile network?

Chile's mobile network has undergone significant development over the years. In the early days, mobile coverage was limited, but it has expanded to cover most parts of the country, except for mountainous or remote areas. Entel is the largest and most popular mobile network service provider in Chile, offering good coverage in many regions.
