

# **China Mobile Wireless solar container communication station Inverter**

## Overview

---

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Is Chinese inverter equipment undocumented?

Reuters analysts identified that the undocumented equipment has been found in multiple Chinese inverter models over the past nine months, with similar discoveries in battery storage systems from various Chinese manufacturers.

Who makes Chinese inverters?

Chinese inverters from top manufacturers have taken over the world's markets; Huawei, Sungrow, and Ginlong Solis are among them. Huawei accounted for 29% of the inverters that were sold in the world in 2022. While it left the U.S. market in 2019, its equipment is used in many places.
