

Colombian aluminum frame solar panel manufacturer

Overview

Who makes a solar panel aluminum frame?

Wellste Aluminum has manufactured and supplied solar panel aluminum frame for over 20 years. 30 engineers, 10 years of aluminum industry working experience can offer you the best solution for your solar panel and solar system project.

What are solar panel frames made of?

Most of the solar panel frames we provide are made from anodized aluminum due to the strength, durability, and resistance of the material. Anodized aluminum is a non-conductive material which causes no interruptions in the normal functioning of solar panels. It has a high level of tensile strength to resist winds, snow, and other natural elements.

Why is aluminum used in large power solar station project?

Aluminum is becoming more and more widely used in large power solar station project because of its cost and advantages over other material. They play an important role in solar panel modular.

What are the benefits of aluminum solar panel frames?

The aluminum solar panel frames protect the solar panels from weather-related and physical damage in the completed solar panel mounting system. The aluminum frames envelop the sides and corners of glass solar panels, supporting the layers beneath the glass and enables the effortless mounting of panels.
