

Containerized generator fire fighting

Overview

Does a generator room need a fire suppression system?

A good fire suppression system for a generator room is necessary. Generally, there are a number of fire extinguishing system types for generator rooms, such as the traditional sprinkler systems, combined sprinkler-foam systems, water mist systems and gas fire extinguishing systems.

What is a centumtm force containerized generator set?

Centum™ Force containerized generator set are engineered for fast start-up and optimized for diverse critical power requirements. Each generator is equipped with an advanced paralleling control module, allowing it to support a fast start of multiple units paralleled for power demands in emergency situations.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Are FirePro fire suppression systems suitable for diesel generators?

FirePro fire suppression systems are suitable for the protection of diesel generators, as they are installed directly within the enclosure at risk.
