

Danish energy storage fire equipment manufacturer

Overview

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

Does Denmark have a standard for lithium-ion battery fire and explosion testing?

Denmark also lacks specific protocols for Lithium-ion battery fire and explosion testing, e.g., UL 9540A, which is a benchmark test recommended in many other countries. Danish guidelines may furthermore provide more clarification on when and which suppression systems should be installed, depending on BESS design parameters.

Is Denmark a good country to work with fire services?

While Denmark emphasizes collaboration with fire services, there is a lack of clear tactics and water management strategies, a gap covered by countries like Sweden and Australia. Some of the identified knowledge gaps include limited understanding of explosion prevention and fire suppression in large-scale BESS settings.
