

Danish generator communication BESS power station

Overview

How will a Bess project help Denmark's energy grid?

Denmark's energy grid, which has been a frontrunner in incorporating wind power, remains exposed to periods of imbalance and price fluctuation, and BESS installations will offer useful management and optimization. The Everspring portfolio, financed by Ringkjøbing Landbobank, is intended to provide flexible capacity to the Danish grid.

Which companies are deploying grid-scale Bess in Denmark?

Other companies deploying grid-scale BESS in Denmark include (primarily) solar developers Better Energy, Eurowind Energy and Nordic Solar as well as BESS developer-operator Dais Energy, with CEO Daniel Connor discussing the market with Energy-Storage.news late last year.

Who will supply Copenhagen Energy's 132 MWh Everspring battery energy storage system?

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.

What is the battery energy storage system (BESS) project?

This vision poses challenges for the grid to be stable and reliable. The objectives of the project are to generate hands-on experience of developing and operating battery energy storage systems (BESS) in the renewable energy-based power system of the future. Two large scale batteries of 0.4 MW/0.1 MWh and 1.2 MW/0.4 MWh will be tested and operated.
