

Design of BMS solar container energy storage system in Laos

Overview

What is a Bess container?

BESS containers are more than just energy storage solutions, they are integral components for efficient, reliable, and sustainable energy management. BESS containers are designed for safety and scalability. Their ability to be stacked and combined allows for customization according to project size.

What is a battery management system (BMS)?

The BMS provides real-time battery status to the EMS, which processes this data to make decisions and sends instructions to the PCS for execution. For instance, if BMS detects high temperature, EMS may halt discharging via PCS to prevent damage.

Why should you choose Bluesun energy storage container solutions?

The professional technical service team makes reasonable design according to the roof type of customers to ensure the efficient operation of customer projects. Bluesun provides 500 kwh to 2 mwh energy storage container solutions. Power up your business with reliable energy solutions.

What is a BMS & how does it work?

The BMS is the brain of the battery pack in a BESS, responsible for monitoring and protecting individual cells to prevent damage and extend lifespan. It measures critical parameters such as voltage, current, and temperature, while calculating the State of Charge (SOC) and State of Health (SOH).
