

Does the container refrigerator have a generator

Overview

Do refrigerated containers have generators?

Some refrigerated containers feature built-in generators. These allow for independent power generation during transit or in areas without external power access. Operators can use diesel generators in remote locations or when stationary power is unavailable. These portable units provide energy to keep the cooling system running.

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.

What type of generator is used for refrigerated shipping containers?

- Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

What is a refrigerated container?

A refrigerated container, often called a reefer, is a special type of shipping container designed to transport temperature-sensitive goods. These containers look like regular shipping containers but have built-in refrigeration units to maintain a stable environment inside. Refrigerated containers can maintain temperatures between -30°C and +30°C.

Types of Gensets Used in Shipping
When Are Gensets used?
How Much Fuel Do Gensets consume?
Popular Genset Brands
Due to the different modes of transport that a reefer container is moved by, there are various types of gensets. Each of these gensets is used in specific applications, to ensure that the refrigeration unit receives enough power to cool the container's interior. When it comes to shipping, generator sets are either integral, undermount, or clip-on. See more on [freightcourse](#) [kuehne-nagel](#)
