

Dublin s new energy storage policy update

Overview

What is the energy storage policy framework for Ireland?

The Electricity Storage Policy Framework for Ireland published by my Department in July 2024 included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Engagement with the Joint System Operator Programme has commenced in relation to Action 2, the emerging technology sandbox.

What is the electricity storage policy framework?

The first memo regarding the Electricity Storage Policy Framework sets out the actions to be taken in maximising the incorporation of available renewable electricity across the grid system, underpinning the role that ESS is expected to play in meeting the CAP targets and beyond, as well as its role in the electricity transition for Ireland.

Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid?

In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems – systems that have the capacity to deliver electricity throughout at least a four-hour period – are integrated into Ireland's electricity grid.

What is Ireland doing about battery & storage?

With a recent policy statement, Ireland is seeking to accelerate the growth and integration of battery and other storage systems into Ireland's electricity grid.
