

EK SOLAR Home Solar Power System

Overview

What is a solar home system?

A Solar Home System is an independent energy setup designed to power residential appliances using solar energy. It consists of solar panels, a battery, inverter, and charge controller. These systems are especially beneficial in areas with unreliable grid power or where homeowners wish to reduce their carbon footprint. 1. Solar Panels.

How does Indian government support solar installation?

The Indian government offers subsidies under schemes like MNRE (Ministry of New and Renewable Energy), reducing the upfront cost of installing a Solar Home System. States may also have individual policies supporting residential solar adoption. Initial investment varies depending on system size and type.

Does a home solar energy system save money?

- **Reduces Electricity Bills:** Once installed, a home solar energy system can significantly reduce or even eliminate your electricity bills. The energy generated is yours to use, and any surplus can often be sold back to the grid, providing additional savings or income.

How do solar panels work?

These panels are made up of photovoltaic cells that transform solar energy into direct current (DC) electricity. However, most homes run on alternating current (AC), so an inverter within the system converts DC into usable AC power. This electricity then flows through your home's wiring, powering your appliances and lights.
