

EK flywheel energy storage project in Valparaiso Chile

Overview

Can flywheel energy storage improve wind power quality?

FESS has been integrated with various renewable energy power generation designs. Gabriel Cimuca et al. proposed the use of flywheel energy storage systems to improve the power quality of wind power generation. The control effects of direct torque control (DTC) and flux-oriented control (FOC) were compared.

Which energy storage projects are co-located with solar plants in Chile?

Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile. Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Renovables are planning 200 MW/800 MWh and 90 MW/200 MWh projects, respectively. From pv magazine EES News site.

How does a flywheel work?

The power system delivers electrical energy to the flywheel device. Discharge: The process converts the mechanical energy consumed by the rotation of the flywheel into electrical energy and transmits it out, the drive motor operates as a generator, and the speed of the flywheel will decrease accordingly.

Which companies are building large-scale battery energy storage projects in Chile?

Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Renovables are planning 200 MW/800 MWh and 90 MW/200 MWh projects, respectively. From pv magazine EES News site three different developers announced separate large-scale battery energy storage (BESS) projects collocated with solar farms in Chile.
