

Eastern Europe 100W Solar Cell

Overview

Which European countries have the most solar energy?

The age of solar energy is dawning in Eastern Europe: According to the European industry association SolarPower Europe, Poland has been one of the top ten leading countries in Europe in terms of PV deployment since 2016. Hungary has joined the list after adding 1.6 gigawatts (GW) of PV capacity in 2023, a 45 percent increase over the previous year.

Can European solar production underpin resilience?

A new market analysis from SolarPower Europe highlights the potential of European solar production to underpin the resilience of the European sector. SolarPower Europe has published a new report mapping Europe's solar PV module production equipment capacity.

How many solar PV modules are made in Europe?

Today, at least 38 European solar PV module production equipment manufacturers operate on the continent, in nine countries (DE, FR, IT, NL, CH, ES, HU, FI, NO). Most - 75% - are active in the cells and modules equipment manufacturing segment.

Can the EU revive solar PV Manufacturing in Europe?

The EU's opportunities are now aligned with the Clean Industrial Deal proposed by the EU Commission, which should help revitalize the Solar PV manufacturing in Europe, although more support measures will still be needed. Kivanc has been added to this edition of Sinovoltaics' Solar Supply Chain Map.
