

Egypt Communications Company Base Station

Overview

What happened at the Ramses Central Telecommunications Building in Cairo?

Egypt Daily News - Civil defense teams successfully brought a renewed fire under control Monday at the Ramses Central telecommunications building in downtown Cairo, following a second outbreak of flames at the same site. Firefighters have since begun cooling operations to prevent the blaze from reigniting once again.

How did Telecom Egypt respond to a fire?

According to a statement from the National Telecommunications Regulatory Authority (NTRA), firefighting units and technical teams from Telecom Egypt were dispatched immediately to the site to contain the fire and isolate electrical currents throughout the facility to prevent further damage.

What happened to fixed-line telephone and internet services in Cairo & Giza?

The outage affected fixed-line telephone and internet services in several districts across Cairo and Giza, prompting concerns among residents and businesses alike. As restoration work continues, authorities are urging the public to remain patient while technical teams work to fully restore services.

What happened at Telecom Egypt?

The incident, which occurred in one of the equipment rooms of the facility operated by Telecom Egypt, led to a temporary suspension of services and raised concerns over the vulnerability of key digital infrastructure.
