

# **Energy company uses 40kWh photovoltaic energy storage container**

## Overview

---

What is a photovoltaic-Storage Integration Project?

Photovoltaic-Storage Integration Projects - Promoting Renewable Energy Utilization Combining photovoltaic (PV) systems with ESS forms an integrated energy supply system that maximizes solar energy utilization and storage.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a residential energy storage system?

Our residential energy storage systems allow homeowners to store the energy produced by their solar panels during the day and use it at night or during periods of low sunlight. With our energy storage systems, residents can reduce their dependence on the grid and enjoy greater energy independence.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);
