What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

What is a solar battery module?

Ideal for retrofitting existing solar systems or building new setups, the Battery Module guarantees efficiency and reliability in any energy solution. Key features: The AC Battery features a battery module that offers a seamless plug-and-play solution compatible with any third-party solar inverter.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.
