

# Energy storage peak shaving system

## Overview

---

Does energy storage make peak shaving easy?

This guide explains how energy storage systems make peak shaving easy for both homes and businesses—plus real-world tips from ACE Battery. In an era of rising electricity costs, unpredictable peak demand charges, and growing pressure for energy independence, peak shaving energy storage is no longer a luxury—it's a necessity.

What is peak shaving?

Peak shaving, or load shedding, is a strategy for eliminating demand spikes by reducing electricity consumption through battery energy storage systems or other means. In this article, we explore what is peak shaving, how it works, its benefits, and intelligent battery energy storage systems. Electricity is essential to modern life.

What types of peak shaving solutions do ace battery offer?

At ACE Battery, our peak shaving solutions come in various formats—from compact modular home battery units to industrial-grade containerized energy storage systems —each customizable to match your load profile and energy goals. [Commercial vs. Residential Applications: What's the Difference?](#)

.

How can a facility reduce energy consumption during peak shaving?

To implement peak shaving, a facility can temporarily reduce energy consumption by scaling down production or activating an on-site power generation system. Another option is to rely on a backup battery to provide power during peak hours.
