What is a battery monitoring system (BMS)?

BMS performs several functions, including monitoring the battery's state of charge, state of health, and state of safety. The design and operation of BMS are critical in ensuring the safety and efficiency of EV batteries.

What is a battery management system?

A battery management system monitors and ensures the safe operation of batteries, crucial for preventing accidents like ignitions, electric shocks, and explosions. Also known as a battery management unit (BMU), this technology is gaining prominence with the rise of smartphones and the shift towards electric vehicles (EVs).
