

Export requirements for energy storage lithium batteries

Overview

Do you need a license to export lithium ion batteries?

Specifically, exports of lithium-ion battery cells or packs with a weight energy density of 300 Wh/kg or higher will now require a license. In addition, specialized manufacturing equipment such as winding machines, lamination machines, liquid injection machines, and capacity cabinets are also listed as controlled items.

What is China's Lithium battery export control policy?

The export control policy marks a strategic transition for China's lithium battery sector—from rapid, unrestrained global expansion toward controlled, innovation-driven growth.

What is a lithium battery export control framework?

The latest export control framework focuses on high-tech segments of the lithium battery supply chain, encompassing not only finished products but also advanced manufacturing equipment and proprietary production technologies.

Does China tighten export controls on lithium batteries & graphite?

China tightens export controls on lithium batteries and graphite materials, reshaping the global EV and energy storage supply chain.

Export requirements for energy storage lithium batteries

[Global Lithium Battery Certification & Export Requirements ...](#)

Nov 13, 2025 · ? Global Lithium Battery Certification & Export Requirements (2025 Edition) As a high-energy density energy storage product, lithium batteries are classified as Dangerous ...

Understanding Export and Import Standards for Lithium Ion Battery ...

Sep 30, 2025 · Table of Contents In such a rapidly changing world and quickly emerging technological context, the fastest urgent need is for efficient and persistent energy storage ...

[Required Certifications for Energy Storage Battery Export](#)

Mar 3, 2025 · The energy storage market is booming globally, and certifications are a key concern for industry professionals. This guide provides an overview of necessary certifications for ...

[China imposes new export controls on lithium ion battery ...](#)

Oct 13, 2025 · Specifically, exports of lithium-ion battery cells or packs with a weight energy density of 300 Wh/kg or higher will now require a license. In addition, specialized ...

[China imposes export controls on lithium-batteries and ...](#)

6 days ago · The decision is effective from 8 November 2025 and implements new export control restrictions on items related to lithium batteries, cathode materials, artificial graphite anode ...

[China Issues New Rules on Exports of EV Batteries and ...](#)

Aug 6, 2025 · The restrictions China implemented include three core technologies linked to battery-cathode production for lithium iron phosphate (LFP) batteries, a popular type of lithium ...

[Navigating China's New Export Controls on Lithium Batteries...](#)

Oct 11, 2025 · Navigating China's new lithium battery export controls and artificial graphite anode restrictions is crucial for global industry players. These regulations target high-energy-density ...

Navigating Import and Export Certifications for Optimal Lithium Battery

Aug 1, 2025 · Understanding Lithium Battery Import Regulations: Key Compliance Requirements When dealing with Lithium Battery import regulations, understanding compliance requirements ...
