What is 11kV metal-enclosed switchgear?

11kV metal-enclosed switchgear is a critical component of medium-voltage distribution systems. It adopts a modular design philosophy, integrating vacuum circuit breakers, disconnectors, current/voltage transformers, protective relays, and control units within metal-enclosed compartments to form a complete power distribution solution.

What is a metal-enclosed switchgear?

Compliant with IEC 62271-200 standards for metal-enclosed switchgear, it is designed for indoor installation. Typical applications include factory distribution rooms, commercial complex substations, hospital backup power systems, and photovoltaic plant grid connections.
