

Financing for a 100kW Solar Container Project

Overview

What is the cost of a 1MW solar project?

With all costs taken into account, a 1MW solar project can cost between \$820,000 and \$1.36 million. The biggest challenge in raising funding is attributed to the large levels of early-stage risk. Returns on the solar project investment are 15.55% on average.

How does a solar PV project finance?

Financing Structure and Debt Sizing – Debt Financing Structure: Solar PV projects often utilize project finance structures involving a syndicate of lenders. Model debt terms including senior and subordinated tranches, interest rates (fixed vs. floating), tenors, debt sculpting, interest rate hedging mechanisms, and grace periods.

What are the average returns on a 1MW solar project investment?

With all costs taken into account, a 1MW solar project can cost between \$820,000 and \$1.36 million, but returns on the solar project investment are 15.55% on average. The biggest challenge in raising funding is attributed to the large levels of early-stage risk.

What are the upfront costs of a 1-megawatt solar project?

The upfront costs associated with the preparation of the land for the solar project are the biggest obstacle in setting up a 1-megawatt solar project. Depending on where you are in the world, this project typically generates upwards of \$40,000 per year from the sale of electricity and significantly more than this in some markets.
