

# Foreign trade energy storage batteries

## Overview

---

Why did Tesla export a battery?

This export highlights Tesla's further expansion in the global energy storage market, and also underlines the extension of its battery technology from electric vehicles to energy storage, according to the company. "Megafactory gives us the ability to scale production and efficiency," said Mike Snyder, vice president of Tesla.

What percentage of energy storage systems are based on Chinese batteries?

Fuelled by rapidly increasing demand within China itself, Chinese batteries account for nearly 90 per cent of global capacity for energy storage systems (ESS), including a market share of more than 80 per cent in the US and more than 75 per cent in Europe.

Did Tesla export its first batch of energy-storage batteries to Australia?

SHANGHAI, March 21 (Xinhua) -- Tesla's new Megafactory in east China's Shanghai on Friday exported its first batch of Megapack energy-storage batteries, the company announced. It took the new Megafactory just over a month after its production launch to achieve its first export, with the batteries being transported from Shanghai Port to Australia.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.
