

Free consultation on two-way charging for folding containers used in field research

Overview

What is vehicle-to-grid charging?

Vehicle-to-Grid charging allows energy to flow in both directions between an electric vehicle and the power grid. This means that an EV can not only be charged using the grid, but it can also send energy back to the grid during high-demand periods, providing a valuable service to the energy system.

What is bidirectional charging?

Bidirectional charging, also referred to as two-way charging, is a cutting-edge technology that enables electric vehicle batteries to both receive and deliver energy to and from an external power source. This marks a significant improvement over the conventional charging process, where EVs can only receive energy from an external power source.

Do I need a dedicated bidirectional charging unit?

For V2H and V2G bidirectional charging, a dedicated bidirectional charging unit is needed. The charger is designed to convert the DC power from the EV battery back to AC power, which can be used to power a home or send electricity back to the grid.

What is vehicle-to-load charging?

Vehicle-to-Load charging allows an EV to be used as a portable power source powering devices like laptops, speakers, or other electrical devices during camping or fieldwork. V2L charging is becoming increasingly common, as more and more EVs are equipped with bidirectional charging capabilities.

Free consultation on two-way charging for folding containers used in

[Optimized coil and current flow designs for wireless charging](#)

May 7, 2024 · This paper introduces three different shapes of wireless charging containers (i.e. quadrangular prism, octagonal prism, and hexagonal prism) and presents optimal current flow ...

[Octagonal Prism-Based Wireless Charging Container with ...](#)

May 20, 2024 · The optimized folded coil designs for octagonal prism-based wireless charging containers have been verified to effectively enhance the magnetic field distribution inside the ...

[Investigations on the use of a wireless power modulator ...](#)

The two orthogonal folding coils are capable of generating relatively uniform magnetic fields within the wireless charging container. Operation of a singular coil allows the receiver to ...

[Dynamic charging strategies for battery-powered IGV based ...](#)

Feb 24, 2025 · To enhance the charging efficiency of a battery-powered intelligent guide vehicle (B-IGV) at an automated container terminal (ACT), a dynamic charging scheduling strategy ...

[Multiple Folding Coils Design for Octagonal Prism-Based ...](#)

May 11, 2024 · This paper presents an octagonal prism-based wireless charging container with multiple folding coils winding equidistantly around the surface of the container.

[Full article: Smart charging with demand response and ...](#)

Jul 20, 2024 · In the optimised plan, charging periods are slightly adjusted based on energy price in each period as part of a demand response strategy, and intermittent charging is actively ...

[Enabling two-way communication: Principles for ...](#)

Dec 4, 2023 · Bidirectional charging technology takes all the use cases and benefits of smart charging, as shown in Figure 1, and goes one step further. It allows electricity to flow both into ...
