

# Georgia offshore wind power storage project

## Overview

---

How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource. Ascend Analytics is administering the request for proposal (RFP) on behalf of Georgia Power.

What is Georgia's energy storage project?

The storage project is expected to be completed in multiple stages, with the full implementation stretching through to the end of 2028. The primary aim of this initiative is to enhance the flexibility, stability, and security of Georgia's electricity system by improving the capacity to store and distribute renewable energy.

Can offshore wind be commercially viable in Georgia?

Offshore wind has significant potential in Georgia, particularly in the Black Sea region, where the wind resource is favourable. However, this technology is still in the early stages of development, and substantial infrastructure investment is needed to make offshore wind commercially viable.

Why is energy storage important in Georgia?

Energy storage is pivotal in Georgia's strategy to integrate renewable energy into the national grid. As renewable sources such as wind and solar are intermittent by nature, they often generate more energy than the grid can immediately use or produce insufficient energy during periods of high demand.

## Georgia offshore wind power storage project

### [Georgia energy storage: Power Seeks Impressive 500 MW Deal](#)

Oct 10, 2025 · Georgia Power is seeking 500 MW of energy storage with a minimum of 500 MWh to support its renewables expansion, as part of its 2022 Integrated Resource Plan (IRP). The ...

### [Georgia Power IRP Approval Creates New Potential for Wind ...](#)

Jul 22, 2025 · Atlanta, GA - Recently, the Georgia Public Service Commission unanimously approved Georgia Power's 2025 Integrated Resource Plan (IRP), marking a significant step ...

### [Goldwind signs 206MW wind power project in Georgia](#)

Jul 17, 2024 · The uisi project is located near the city of Gori in central Georgia. The total project capacity is 206MW. It is currently the largest single wind power project in Georgia. After strict ...

### [How Georgia wind turbines could support economy, marine ...](#)

Apr 30, 2025 · In a first-of-its-kind study, economic and environmental researchers found the benefits of offshore wind below the surface could boost economic value over time in addition to ...

### [Georgia's Renewable Energy Horizon: Insights from GREDA ...](#)

Within the framework of Energy Week Black Sea 2025 - a unique platform bringing together major stakeholders from Romania, Bulgaria, Moldova, Ukraine, Türkiye, and Georgia - we spoke ...

### [RFP alert: Georgia Power seeks 500 MW of energy storage](#)

Sep 25, 2025 · Also notable is that Georgia Power is looking at longer duration energy storage, with 3,000 MW per year of 4-hour energy storage is projected to be added starting in 2028, ...
