

Helsinki off-grid energy storage inverter

Overview

Will Finland's first decentralized 'behind the meter' solar power and battery storage system?

“Innovestor’s pioneering energy storage initiative is set to build Finland’s first decentralized ‘behind-the-meter’ solar power and battery storage system.

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

What is Fingrid's energy storage system?

These energy storage units deliver 15 MW of power and a total capacity of 60 MWh, actively participating in Fingrid’s regulation electricity and reserve markets. The installation of the first solar panels and battery systems in selected properties is set to begin later this year.

Is the energy system still working in Finland?

However, the energy system is still producing electricity to the national grid and DH to the Lempäälä area, while the BESSs participate in Fingrid's market for balancing the grid . Like the energy storage market, legislation related to energy storage is still developing in Finland.
