

Home inverter system in China in Us

Overview

Are Chinese-made inverter devices posing a risk?

From pv magazine Global Unexplained communication devices have been found inside some Chinese-made inverter devices, according to a Reuters report. The news agency claims U.S. energy officials are reassessing the risk posed by Chinese-made devices according to two unnamed sources. The number of devices investigated was also not disclosed.

Are US energy officials reassessing the risk posed by Chinese-made solar inverters?

The news agency claims U.S. energy officials are reassessing the risk posed by Chinese-made devices according to two unnamed sources. The number of devices investigated was also not disclosed. This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to Reuters.

How many rogue communication devices were found in Chinese solar inverters?

The number of devices investigated was also not disclosed. This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to Reuters. The devices were reportedly found over a period of nine months and include communication devices such as cellular radios.

What if we switched off Chinese inverters?

“Ten years ago, if you switched off the Chinese inverters, it would not have caused a dramatic thing to happen to European grids,” said Philipp Schroeder, CEO of German solar developer 1Komma5. “But now the critical mass is much larger.”
