

How many energy storage power stations are there in Montenegro

Overview

Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant, the Perucica, and the Piva Hydro Plants. The Montenegrin state-owned Electrical Power Company's (EPCG) core activity is electricity generation, transmission, distribution, and supply.

How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perućica (307 MW) and Piva (363 MW).

Where will EPCG install a 60 MWh power plant?

In addition to the two 60 MWh systems at the Nikšić steel mill, EPCG plans to install: a 60 MWh unit at Perućica hydropower plant, a 60 MWh unit at Pljevlja thermal power plant and a 5 MWh system at the planned Kapino Polje solar power plant (5 MW).

How many power plants does Te Pljevlja have?

It also operates the 225 MW TE Pljevlja, the country's sole thermal power plant. The utility also has several small hydropower plants and is developing a number of renewable energy projects, including Komarnica hydroelectric power plant (172 MW), WF Gvozd wind power plant (54.6 MW) and SP Briska Gora solar power plant (250 MW).
