

How to connect the solar container communication station inverter to the network

Overview

How do I connect a wifi module to a solar inverter?

1. Connect the WiFi Module: Locate the designated port on your solar inverter for connecting the WiFi module. Typically, this port is labeled “WiFi” or “Communication.” Insert the WiFi module securely into the port. 2.

How do I connect my inverter to my phone?

Connect your smartphone or computer to the inverter’s WiFi: Go to your WiFi settings on your device. Look for the inverter’s WiFi network (SSID), typically labeled with the inverter brand name. Connect to this WiFi network. If prompted for a password, refer to the inverter’s manual for the default password (usually provided in the documentation).

How do I connect my inverter to my home WiFi?

Once logged in, go to the “Network” or “WiFi” settings section, depending on the interface. Select your home WiFi network: The inverter will scan for available networks. Select your home WiFi network from the list of options. Enter your WiFi password: Type in your home WiFi password carefully, ensuring there are no errors.

How do I connect my solar inverter to my home network?

Use proper cable glands and conduits to protect the wires from physical damage and adverse weather conditions. In the case of the Anker SOLIX Balcony Solar Power System, connecting the inverter to your home network is a straightforward process that involves the use of a Schuko connection cable.
