

How to make energy storage projects profitable

Overview

Are battery energy storage systems a good investment?

Battery Energy Storage Systems (BESS) provide operators with multiple avenues to generate revenue. These systems are not limited to a single function but can capitalise on various market opportunities, making them highly versatile investments.

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate—improving profitability and supporting sustainability goals.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Are battery energy storage systems gaining momentum in Europe?

Recent capacity market auctions have shown strong momentum for battery energy storage systems (BESS) in European markets. In Belgium's latest Capacity Remuneration Mechanism (CRM), BESS projects dominated new capacity awards, securing 350MW across 13 projects and bringing total BESS contracts to 1.1GW.
