

How to replace the lead-acid battery in the base station

Overview

Find out how to replace your lead-acid batteries with lithium for more efficient and reliable power. Understand the necessary steps and precautions.

Are lithium ion batteries better than lead-acid batteries?

The substantial benefits that Lithium Ion technology offer over lead-acid technology means that using Lithium Ion batteries is becoming an ever more popular choice. When considering replacing an existing lead-acid battery bank by a Lithium Ion battery bank one needs to take a couple of things into consideration.

Can a lithium ion battery be a drop-in replacement?

Although the term 'drop-in replacement' is occasionally used in this case, it is actually never as simple as that. To get the most from the Lithium Ion batteries stay within the recommended operating conditions.

Can you change a battery to lithium?

You need to consider some items while changing your batteries to lithium. But it is surely doable if you keep these points in mind. Always use insulated tools when working on batteries and wear safety glasses. Your old lead-acid battery should be recycled in your local center.

Why is my lead acid battery charging directly from my alternator?

If your lead acid battery was charging directly from your car's alternator, you need to make some changes. Lithium batteries have a low internal resistance. It will demand as much current from the alternator as it can handle, leading to overheating or even burning out of your alternator. Victron did a great video about this:
