

How to use Huawei solar solar container communication station inverter to connect to the grid

Overview

Why is Huawei fusionsolar smart PV management system not working?

Huawei FusionSolar Smart PV Management System shows that the communication with the inverter is interrupted. The RS485 cables among inverters are loose or disconnected. The PV string is not properly connected, and the inverter has no DC input. The baud rate or RS485 address of the inverter is changed. The Smart Dongle is faulty.

How do I add a Huawei solar integration?

This integration supports inverters running firmware versions released in 2023 and later. Older firmware versions don't have support for all registers, which can result in the integration failing to work properly. Or: Go to Configuration -> Integrations and click the + Add Integration. Select Huawei Solar from the list.

Can a Modbus device connect to a Huawei solar installation?

Modbus devices only support one connection at a time. Make sure that nothing else is trying to connect to your Huawei solar installation. Otherwise the connection from this integration to your installation will constantly be interrupted. Firmware This integration supports inverters running firmware versions released in 2023 and later.

Does fusion solar work with a Huawei inverter?

A: The inverter will still send it's data to the Huawei cloud, and you will still be able to see live statistics from your installation in the FusionSolar App. However, if you are using this integration via the network, and you (or your installer) need to use the 'Device commissioning' feature of the app, you will need to disable this integration.
